CRA and MRQ regulations, forms and approvals are usually not available until late December, so the final version of T4 TimeSaver will not be shipped until the first week of January. A production version will be available in early December; it will be essentially complete, with the possible exception of some minor changes to the printed returns. It can be used to enter all your data, but we advise you to wait for the final release of the software before final printing or electronic filing of returns. You will be notified by e-mail when the final release is available, and you can download it from our web site.
